DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/3/2008 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection. Due to the RCE filed 4/3/2009, the instant Office action has been made non-final.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, 5, 25, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 2,789,510 (Meynig). Meynig discloses a dosage feed device comprising a dosing element (figure 1), an adjustment device (5), a dosing gap (34), a valve device (41) having an open (figure 1) and closed position (figure 2), an inner member (42), an outer member (33), a flow area (within element 34) of the dosing gap (within element 34) is variable (within element 34), wherein the flow area increase with movement of the inner member (41) relative to the outer

member (33) in the direction of the fluid flow of the additive fluid, wherein the inner member (41) is a dosing cone (end of element 41), wherein the outer member (33) is a counter element (33), wherein the dosing gap (within element 34) is an annular area around the dosing cone (end of element 41), and two or more insertion bevels (9, 17).

Allowable Subject Matter

5. Claims 4 and 6-21 are allowed.
6. Claims 2 and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John K. Fristoe Jr. whose telephone number is (571) 272-4926. The examiner can normally be reached on Monday-Friday, 7: 00 a.m-4: 30 p.m.
